About

I am a high school senior and self-taught programmer, specializing in Javascript web applications and Haskell. When I'm not at school, I'm hacking on open source projects, wrestling, playing around with robots, or attending hackathons.

Work

NGP VAN

June 2014 - August 2014

Developer Intern

ngpvan.com (ngpvan.com)

NGP VAN is the leading technology provider to Democratic and progressive campaigns and organizations, offering clients an integrated platform of the best fundraising, compliance, field, organizing, new media, and social networking products.

Highlights

- Helped create web application to aggregate user data from disparate company websites and scrape social media to create targeted user profiles
- Created internal tool to gamify clean coding

Eventkloud

July 2013 - August 2013

EventKloud is a audience-driven marketing & advertising automation platform for events. Its a smarter way to create cross-channel, streamlined event campaigns to reach, engage & measure your audience all from a central dashboard.

Highlights

- Created dedicated mobile site, reducing page load times twofold
- Created geographic dashboard to streamline sales process

Education

Harvard University

September 2016 -

Bethesda-Chevy Chase High School

September 2011 - May 2015

Skills
